

**Steven C. Rubinow**

Director, Institute for Professional Development
College of Computing and Digital Media

Steve Rubinow is an excellent, multifaceted global executive, strategist and award-winning Chief Information and Technology Officer, with deep experience in transforming companies, working on boards and teaching in university classrooms. Conversant in the latest advances, Steve has the exceptional ability to utilize existing and new ways to employ technology to improve and impact complex industries. Currently he is the Director of the Institute for Professional Development at DePaul University's College of Computing and Digital Media and a Professional Lecturer in the School of Computing and President of Infocology Inc., a technology consultancy.

Most recently as EVP and CTO for Catalina, a personalized digital media company, he led all aspects of global technology. He developed and led a complete transformation of core data and analytic systems, and a modernization of organizational culture to be more entrepreneurial and competitive.

While Steve was at FX Alliance, a global provider of electronic foreign exchange trading solutions, the firm was acquired by mass media and information company Thomson Reuters. Steve was the CIO in Reuters' Marketplaces Division in New York.

As EVP and CIO at the NYSE Euronext in New York, Steve technologically transformed an entire industry. He was responsible for all aspects of technology for the largest global exchange in the world. He combined operations across continents, and designed and developed new data centers, the financial industry's first cloud and a new culture of innovation for global trading. He started this work as CTO for Archipelago Holdings, Inc., in Chicago and integrated three major M&A: NYSE-Archipelago, NYSE-Euronext and NYSE American Stock Exchange. Due to cyber-terrorism threats, Steve had government clearance from major federal security, intelligence and law enforcement agencies for addressing cybersecurity and counterterrorism issues.

In his 2012 induction into the CIO Hall of Fame, Steve was described as "clearly one of the most innovative and transformational CIOs ever." He has held leadership positions in IT and Marketing for leading firms in the internet, investment, manufacturing and service industries. Steve has extensive experience teaching university-level computer science courses and he serves on several Boards of Directors in both advisory and volunteer roles.
